# International Course on
Geotechnical and Structural Monitoring

Course Director: **John Dunnicliff**, Consulting Engineer
Organizer: **Paolo Mazzanti**, NHAZCA S.r.l.

The purpose of the course is to guide participants on how to plan and execute effective geotechnical and structural monitoring programmes. Seventeen **leading experts of the geotechnical and structural monitoring community** from Italy, England, Australia, France, Germany, Norway, Switzerland, USA, Hong Kong and The Netherlands will lecture on the following topics:

- Basic concepts of monitoring and planning
- Contact Monitoring methods
- Remote Monitoring methods
- Management, analysis and interpretation of data

The course is intended for project managers and other decision-makers who are concerned with **management of RISK** during construction, geotechnical and structural engineers, end users, consultants, service providers, manufacturers and researchers working in following sectors:

- Large infrastructures
- Transportation
- Mining
- Oil and gas
- Land and water management
- Sensor and equipment manufacturers

For additional information please contact:

secretariat@geotechnicalmonitoring.com

The venue

The 3 day course will be held in Poppi (Tuscany, Italy) in the main room of a 10th Century Castle.
Poppi is in the countryside of Tuscany near the city of Florence.
Dedicated transportation to Poppi from Florence main train station and city airport will be available.
